

Basel AlBasha

Senior Software Developer

 baselbasha136@gmail.com |  +905318681003 | [GitHub](#) | [LinkedIn](#)

Professional Summary

Dynamic Senior Software Developer with over 4 years of expertise in crafting scalable, high-performance cloud-based solutions. Proficient in Next.js, AWS, React, Node.js, and NestJS, delivering robust full-stack applications with a focus on cutting-edge frameworks. Engineered pre-rendered apps achieving TTFB under 200ms and developed sophisticated data visualization dashboards for enterprise teams. Led the development of a mission-critical application for Stephano Group, a leading industrial company in Canada, optimizing barcode tracking and enhancing operational efficiency. Renowned for designing clean, scalable architectures and solving complex challenges with precision. Thrives in Agile environments, driving collaboration with exceptional leadership and communication skills.

Core Competencies & Tools

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS

Backend: Node.js, Bun, Nest.js, Express, C# .NET, Fastify, Elysia.js

Cloud & Infrastructure: AWS (Lambda, S3, EC2, CloudFront, ECS), Docker, Vercel, Netlify, Cloudinary

Architecture & APIs: REST, GraphQL, Serverless, Microservices

Databases: PostgreSQL, MongoDB, MySQL, DynamoDB

CI/CD & DevOps: GitHub Actions, Jenkins, Docker, Testing (Jest, Cypress), Swagger

Soft Skills: Team Leadership, Communication, Agile/Scrum, Problem Solving

Professional Experience

Reeveez — Founder & Lead Engineer | *AI SaaS Startup* | 2025 – Present

- Founded an AI SaaS startup focused on reducing manual operations through AI-powered dashboards for enterprises.
- Designed and led development of a platform embedding AI assistants directly into dashboards to support decision making across factories, HR, analytics, and admin workflows.
- Implemented AI-driven data analysis, summaries, and action-based chat interactions integrated into real business processes.
- Built role-based AI access, usage limits, and token-based controls to ensure secure and scalable enterprise usage.
- Developed workflow automation triggered by user actions, enabling AI-assisted operational flows.
- Led technical architecture and collaborated with a team of 4 co-founders/partners, contributing across frontend, backend, and AI integration.
- Currently developing the platform for the first enterprise client, delivering a production-ready AI dashboard.

Tech Stack: Next.js, TypeScript, Tailwind CSS, Node.js, NestJS, OpenAI / Gemini APIs, LangChain, n8n, Docker

Toros Yazılım — Front-End Developer | *Türkiye* | June 2024 – September 2024

- Developed responsive, high-performance user interfaces using React, TypeScript, and Tailwind CSS, delivering clean and maintainable code across multiple features.
- Built complex UI components and data-driven dashboards with DevExtreme, streamlining enterprise-level workflows and enhancing UX.
- Collaborated with cross-functional teams via GitLab for version control, code reviews, and CI/CD processes, ensuring smooth deployments and high-quality code.

- Translated design mockups into pixel-perfect front-end implementations while maintaining full responsiveness and cross-browser compatibility.
- Contributed to Agile sprints, feature planning, and bug fixing to ensure timely delivery of project milestones.

Tech Stack: *React, TypeScript, Tailwind CSS, DevExtreme, GitLab*

ANMAT — Software Engineer (Hybrid) | Turkey | 2022 – 2023

- Spearheaded the development of a modern Employee and HR Management Dashboard, focusing on performance, scalability, and user experience.
- Engineered a responsive, user-friendly interface using React, Next.js, and Tailwind CSS, ensuring a seamless user experience across all devices.
- Built and maintained scalable server-side logic and RESTful APIs with Node.js and Express.js, ensuring robust data processing and secure communication.
- Implemented strategic caching for API requests, significantly reducing data retrieval times and enhancing overall application efficiency and performance.
- Utilized TypeScript to enforce type safety, improve code maintainability, and facilitate effective collaboration within the development team.
- Authored and managed comprehensive API documentation using Swagger, streamlining the development workflow and improving inter-team communication.

Tech Stack: *React, Next.js, TypeScript, Node.js, Express.js, Tailwind CSS, Swagger*

Freelance Portfolio

Backend Developer | "Nothanks Mobile Application"

- Engineered and contributed to the backend of a mobile app that surpassed 13 million downloads, collaborating within a backend team to design a scalable, high-performance database architecture using Firebase to ensure stability and speed at massive scale.

Tech Stack: *Firebase, RESTful APIs, Cloud Functions, Nestjs*

Full-Stack Developer | "Gaming eCommerce Platform"

- Built a full-stack eCommerce website for a local gaming store featuring server-side rendering for optimal performance, with Next.js on the frontend and a robust backend powered by Node.js and NestJS.

Tech Stack: *Next.js, Node.js, NestJS, Server-Side Rendering*

Full-Stack Developer | "News Management Platform"

- Developed a complete news website with a custom admin panel using Express.js for the backend and EJS for the frontend, enabling administrators to seamlessly upload and manage articles.

Tech Stack: *Express.js, EJS, Node.js, Content Management*

Frontend Developer | "Comments & Messaging Enhancement"

- Joined an ongoing project to overhaul the comments and messaging features, focusing on enhancing UI/UX and optimizing performance metrics within an existing C# and .NET Framework environment.

Tech Stack: *C#, .NET Framework, UI/UX Design, Performance Optimization*

Education

Bachelor's Degree in Computer Software Engineering

Gümüşhane University | September 2021 – June 2025
